

MY STORY/EXTRACURRICULAR ACTIVITIES.

I am very passionate about computer science, especially software programming.

I created and belong to a group for Computer Science 'freaks' in my school, we call it

"Computational

Thinking~Blackboard. There, we learn, embark on projects and challenge each other towards our growth and development. It is LOVELY!

I teach some students online on some computation basics too.

Outside the computational world, when I am not talking code, **I spend some time with some of the teenagers** in my local assembly and some in my community secondary/high school, teaching, educating, and inspiring them for success. I do these Mondays, Wednesdays, Thursdays, and Fridays taking advantage of their morning devotions.

On Sundays, I volunteer for my local assembly service team and choir. I mostly sing and play either the guitar or the drums.

HOBBIES

Writing and looking at Codes
Playing the guitar/the drums
Singing
Reading and Researching

ENYINNAYA DELIGHT

BASIC INFORMATION

FULL NAME: ENYINNAYA OBINNA DELIGHT

DATE OF BIRTH: 27th July, 1994

NATIONALITY: Nigerian

STATE OF ORIGIN: Abia State

L.G.A: Obi-Ngwa

MARITAL STATUS: Single

STATE OF RESIDENCE: Bonny Island, Rivers State.

EDUCATION

Federal Polytechnic of Oil and Gas, Bonny Island, Rivers, Nigeria.

[ND, Computer Science]

[Relevant Courses]

Logic and Linear Algebra, **Python Programming**, System Programming using **Java**, System Programming using **C, Data Structure and Algorithm**, Digital Electronics and Circuit Design, Web Technology, , System Maintenance, Computer Networking, Probability Theory, Embedded Systems (Arduino), etc.

[Growth Process]

I am very proficient in All Microsoft packages (Word, Excel, PowerPoint, Access, etc.-Advanced Level).

Great Graphics Design skills using CorelDraw and Photoshop (Advanced).

I also possess intermediate level skill in 2D Engineering Drawing using AutoCAD.

Proficient in Database Management using Structure Query Language (MySQL).

I am a Full Stack web developer using HTML, CSS, JS, PHP, MySQL, with frameworks like Bootstrap, Codeigniter MVC, and Laravel.

Along with website management and maintenance.

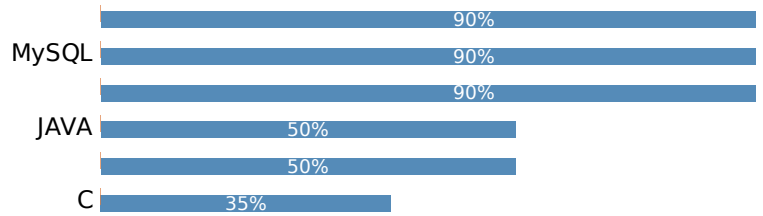

I also develop mobile android apps using Java and Android Studio.

I have also explored embedded system programming using the C, C++ programming languages for basic smart home appliance automation.

I am also proficient in Social Media Marketing and Management.

TECHNICAL SKILLS (LANGUAGES/TECHNOLOGY)

- [HTML, CSS, JS, PHP, MySQL, LARAVEL, CODEIGNITER] — 5yrs
- [**JAVA, PYTHON, C**] ----3 yrs.
- Android Studio, Eclipse, IntelliJ

EXPERIENCE AND PROJECT EXAMPLES

[2015]

Started an Online Digital Agency.

Recruited and trained my little team of three teenagers on Computational Thinking, web development and graphic designing.

[February, 2021]

Simple Library Management System using Java

Built a simple Library Management System with Java, and JDBC that runs from the CLI.

[Currently]

Weather App, To-Do-List App for mobile.

I am currently working on some mobile app using java and Spring Boot Framework.

[For My Final Year Project]

Enhanced Hospital Management System for Bonny General Hospital

I am working on a Hospital Management System for the General Hospital on the Island where I reside. It's a System Application deployable in a local network and over the cloud that helps facilitate the day-to-day operations of the hospital.
